

We maintain **BUY** on Elecon Engineering Company (EECL), with **TP of Rs750**. EECL reported a mixed set of results for **Q2FY26**, with consolidated revenue/EBITDA/PAT growing **14%/12%/flat YoY**. EBITDA margin was lower by **37bps YoY**, on account of unfavorable mix in the gear business. The flat PAT growth was owing to increase in depreciation on new capacity commissioning and higher tax rate. On a positive note, order inflow jumped up **28% YoY** to **Rs6.9bn**, taking the order backlog to **Rs12.3bn**, up **27% YoY**. The management indicated a strong enquiry pipeline across the business and exuded confidence in achieving **Rs26.5bn** revenue for **FY26** as against **1HFY26** reported revenue of **Rs11bn**. Besides the strong domestic demand, we expect exports to see a meaningful recovery on the back of increased focus on key geographies, such as **Europe, Middle East, Americas, Nordic countries, and Russia**. We estimate revenue and PAT CAGR at **21% and 24%**, respectively, over **FY25-28**.

Q2FY26 results, a mixed bag

The company saw an overall mixed set of results, with revenue coming in line with and EBITDA margin lower than estimates. Revenue was up **14% YoY** at **Rs5.8bn**, led by Gear business growth of **11% YoY**, and a strong **32% YoY** growth in MHE. EBITDA margin declined by **37bps YoY** to **21.7%**, mainly due to weakness in the Gear business on account of an unfavorable mix and higher staff cost due to commissioning of new capacity. However, MHE margins expanded by **137bps YoY** which partially restricted the impact. We expect margin on full-year basis to log at around **25%**.

Order inflow going strong

EECL witnessed **28% YoY** growth in order inflow at **Rs6.9bn**, mainly led by MHE up **84% YoY** and Gear business up **15% YoY**. The growth has mainly come from domestic markets – from key segments like Power, Steel, and Cement. The strong order book resulted in **27% YoY** jump in the order backlog at **Rs12.3 bn**.

Middle East geopolitical issues impact exports

Q2FY26 exports were flat at **Rs1.2bn** (**21% of sales** as against **24% in Q2FY25**). The management highlighted that geopolitical tensions in the Middle East impacted exports, which are likely to see a recovery in Q3 given the strong enquiry pipeline. We believe EECL's geographical diversification mitigates risks associated with the cyclical nature of the domestic market. It targets increasing exports' contribution to **50% by FY30**.

View and valuation

EECL's leadership in gears, strong export momentum, and robust recovery in the MHE segment position it to be a key beneficiary of India's industrial and infrastructure cycle as well as global opportunities. At the CMP, the stock trades at **~18.4 P/E** of Sep-27E EPS, which appears attractive.

Concall KTAs

- **Guidance:** The management reiterated its FY26 guidance of Rs26.5bn revenue and EBITDA margin of ~24%. It expressed confidence in meeting targets due to the strong pending order backlog and healthy inquiry levels.
- **Gear division:** EBIT margin was impacted by increase in employee costs and change in the product mix, as well as accelerated depreciation on assets capitalized recently. EECL's Sep-end order backlog stands at Rs7.7bn, providing strong visibility for upcoming quarters. The gear division's product mix: Catalogue products – 54%; and Engineered products – 46%.
- **MHE division:** The management's strategic focus on product supply and capitalizing on growing opportunities in after-sales services in the MHE division has resulted in superior growth in revenue (up 32% YoY). The MHE division has an order book of Rs4.6bn, as of Q2FY26-end.
- **Domestic demand:** The management is seeing healthy demand in both, the domestic and overseas markets. In India, it is witnessing sustained investment activity in key sectors like steel, power, and cement; this is expected to drive growth. The company recently received a large order worth Rs800mn from the power sector.
- **International demand:** The overseas business, too, remains on a solid footing, with consistent traction and encouraging inquiry levels across various geographies, with the company focused on penetrating new territories such as South America, Europe, and parts of the Middle East and Asia.
- **OEMs:** The company has onboarded 18 OEMs so far (no new additions YTD). Clients are satisfied with trials; however, slower orders are expected due to the geopolitical climate. Orders are expected to range at Rs300-400mn from OEMS; margins will be stable despite competitive pressures.
- **Capex:** The company plans spending Rs4bn on capex over FY26-28, aligned with its strategic goals. The capex will be funded through a combination of internal accruals and operating leases. The capex is intended for capacity enhancement, equipment maintenance/replacement, and quality/productivity improvements.
- **Dividend:** The company also declared an interim dividend of Rs0.5/share.
